

Automatic Incident Detection (AID)

Safety is everything

Transcend's industrial SSDs seamlessly integrate with AID systems, reshaping traffic management, surveillance, and security. With exceptional storage, ultra-low latency, and endurance, they exemplify technological prowess. Featuring 30µ" gold-finger PCB, corner bond tech, and anti-sulfur resistors, they conquer tough environments, perfectly suiting AID demands. Elevate reliability and performance with Transcend's innovation.

Robust Performance

High-quality 112-layer 3D NAND flash & LDPC ECC algorithms for handling increased workloads during peak times.

Uninterrupted Operation

Power Shield (PS) & Power Loss Protection (PLP) technologies ensure data integrity.

Comprehensive Product Line

Various form factors and interfaces for different systems and applications.

Featured Products

PCIe M.2 2280

MTE712A

PCIe M.2 2280

MTE670T

SATA III M.2 2242

MTS570T

SATA III 2.5"

SSD470P

SATA III mSATA

MSA520I
